7 December 1949

MEMORANDUM FOR THE FILE

OSI sent up documents taken from their files concerning shipments of uranium to Russia. There were fairly complete accounts of all the 1943 and 1944 requests for shipments and action taken in regard thereto.

I delivered these to the Director, who, after reading, said he would have to discuss the matter with Mr. Souers and probably with Mr. Johnson and Mr. Acheson.

The papers in question are classified by other agencies, and we may have no authority to release them. In any case, we will not tell Mr. Brobeck that we have any administrative records until the Admiral has obtained the necessary information.
